

Project Title: Hotel booking

Kehinde Abdulsalam

<https://github.com/KehindeAbdulsalam>}

The purpose of this mini project was to design and develop a spreadsheet system for hotel booking for vacation capable of storing, organizing, and analyzing customer booking reservations efficiently. The project was created using Microsoft excel for visualization.

The system was designed to improve the management the reservation, income, debtors and customer's that need to check out or renew payment by reducing redundancy, improving data accuracy, and allowing future improvements through data formatting, formulas and functions.

The data consists of customer ID, Customer name, total days booked, Total days used, amount paid, and owing. The hotel has two types of rooms which are premium and standard; the premium room costs £75 and the standard costs £50. Customers have an option to choose between a premium and a standard room.

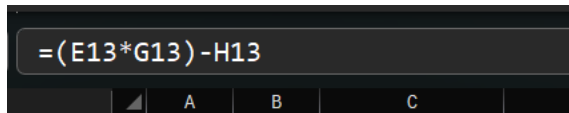

In this project I will be displaying the following;

- Total reserved rooms
- Payments
- Days left
- Room status

Data

Customer ID	Customer Name	Total Days Booked	Total Days Used	Room Cost	Paid
NR001	Kenny Bob	12	7	£75	£500
NR002	Kehinde Abdulsalam	3	4	£75	£150
NR003	John Shally	7	5	£50	£125
NR004	Charles Stallion	8	3	£75	£85
NR005	Angela Fowler	3	5	£50	£100
NR006	Taiwo Great	10	7	£50	£300
NR007	Matt Main	6	4	£50	£150
NR008	Shahid Toungo	3	9	£50	£75
NR009	Raul Chris	6	3	£75	£123
NR010	Raj Gomez	9	8	£75	£120
NR011	Gatithi TY	7	5	£50	£65
NR012	Benson Daniel	5	3	£75	£34
NR013	Mary Mary	23	19	£50	£234
NR014	Cyler Duffin	7	7	£50	£98

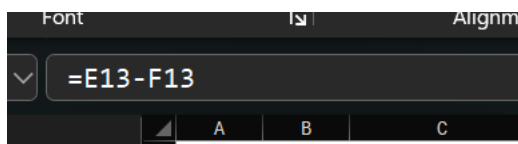

Calculating the customer owing: by multiplying the [Total days booked] * [room cost] and subtracting the amount paid from it [Paid].

After owing calculation has been completed

	Customer ID	Customer Name	Total Days Booked	Total Days Used	Room Cost	Paid	Owing
	NR001	Kenny Bob	12	7	£75	£500	£400
	NR002	Kehinde Abdulsalam	3	4	£75	£150	£75
	NR003	John Shally	7	5	£50	£125	£225
	NR004	Charles Stallion	8	3	£75	£85	£515
	NR005	Angela Fowler	3	5	£50	£100	£50
	NR006	Taiwo Great	10	7	£50	£300	£200
	NR007	Matt Main	6	4	£50	£150	£150
	NR008	Shahid Toungo	3	9	£50	£75	£75
	NR009	Raul Chris	6	3	£75	£123	£327
	NR010	Raj Gomez	9	8	£75	£120	£555
	NR011	Gatithi TY	7	5	£50	£65	£285
	NR012	Benson Daniel	5	3	£75	£34	£341
	NR013	Mary Mary	23	19	£50	£234	£916
	NR014	Cyler Duffin	7	7	£50	£98	£252

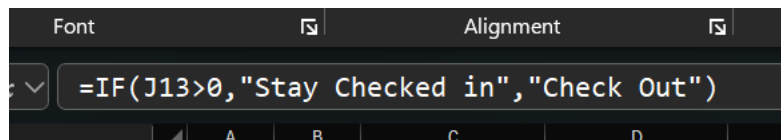

Calculating the Days each customer has left: by subtracting [Total Days Booked] - [Total Days Used]

After calculating the number of days each customer has left in the hotel

Customer ID	Customer Name	Total Days Booked	Total Days Used	Room Cost	Paid	Owing	Days left
NR001	Kenny Bob	12	7	£75	£500	£400	5
NR002	Kehinde Abdulsalam	3	4	£75	£150	£75	-1
NR003	John Shally	7	5	£50	£125	£225	2
NR004	Charles Stallion	8	3	£75	£85	£515	5
NR005	Angela Fowler	3	5	£50	£100	£50	-2
NR006	Taiwo Great	10	7	£50	£300	£200	3
NR007	Matt Main	6	4	£50	£150	£150	2
NR008	Shahid Toungo	3	9	£50	£75	£75	-6
NR009	Raul Chris	6	3	£75	£123	£327	3
NR010	Raj Gomez	9	8	£75	£120	£555	1
NR011	Gatithi TY	7	5	£50	£65	£285	2
NR012	Benson Daniel	5	3	£75	£34	£341	2
NR013	Mary Mary	23	19	£50	£234	£916	4
NR014	Cyler Duffin	7	7	£50	£98	£252	0

Calculating each customer room status if they need to check out or stay checked in their rooms: by using the IF function, IF([Day left]>0,"stay check in","check out")

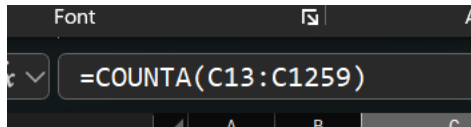

After calculating each customer's room status if they need to check out or stay checked in, their rooms.

Customer ID	Customer Name	Total Days Booked	Total Days Used	Room Cost	Paid	Owing	Days left	Room Status
NR001	Kenny Bob	12	7	£75	£500	£400	5	Stay Checked in
NR002	Kehinde Abdulsalam	3	4	£75	£150	£75	-1	Check Out
NR003	John Shally	7	5	£50	£125	£225	2	Stay Checked in
NR004	Charles Stallion	8	3	£75	£85	£515	5	Stay Checked in
NR005	Angela Fowler	3	5	£50	£100	£50	-2	Check Out
NR006	Taiwo Great	10	7	£50	£300	£200	3	Stay Checked in
NR007	Matt Main	6	4	£50	£150	£150	2	Stay Checked in
NR008	Shahid Toungo	3	9	£50	£75	£75	-6	Check Out
NR009	Raul Chris	6	3	£75	£123	£327	3	Stay Checked in
NR010	Raj Gomez	9	8	£75	£120	£555	1	Stay Checked in
NR011	Gatithi TY	7	5	£50	£65	£285	2	Stay Checked in
NR012	Benson Daniel	5	3	£75	£34	£341	2	Stay Checked in
NR013	Mary Mary	23	19	£50	£234	£916	4	Stay Checked in
NR014	Cyler Duffin	7	7	£50	£98	£252	0	Check Out

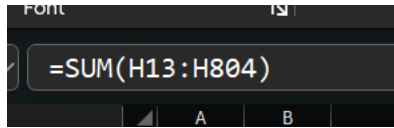

Creating KPI: creating key performance indicator for Total client, Total Invoice, Total Owing and Total Rooms Booked.

Margin lines together to create the KPI and make the text border using the countA function for the total client, sum function for the total invoice, sum function for the total client and sum function for the total rooms booked

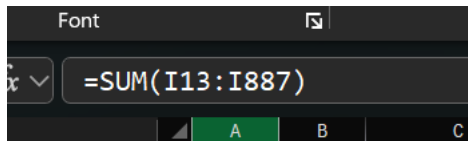

Total client formula

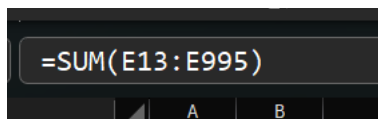

Total invoice formula

Total Owing

Total Rooms Booked

All functions extend to above 800 in case of future input of data and automatic calculations.

Total Client	Total Invoice	Total Owing	Total Rooms Booked
12	£3,891	£16	78

Design

Header: creating a visualizing header stating what the spreadsheet is for by margin lines together to create the header.

Add colors to the KPI and enhance the data by using the **condition formatting** – using bar chart to display the customers owing. The customer who has exceeded their booking days get a red color display of room status, customer who has not yet exceeded their booking days get a green color, and customers who have the same number of booked days and days used have a yellow color.
